

# Industrial Spray Gun for Coatings Application

This spray gun is capable of ejecting floss, coarse, and fine patterns. It is used in exterior decoration and suitable for coatings with specific viscosity and air pressure requirements.

## Product Overview

### Industrial Precision Application

This industrial spray gun is engineered for high-performance coatings application in exterior decoration projects. It provides versatile pattern control, allowing for floss, coarse, and fine spray outputs to suit various surface requirements. Designed for professional reliability, it ensures consistent and even coverage when calibrated to the specific viscosity of your coating materials.

## Operating Parameters

### Operating Pressure Settings

Viscosity	Air Pressure (MPa/bar)
Below 25 seconds	Above 0.15 (1.5)
Above 25 seconds	Below 0.15 (1.5)

Pressure Measurement Standard | MPa, bar

## Technical Features

### Supported Spray Patterns

- Floss pattern
- Coarse pattern
- Fine pattern

### Application Fields

Exterior Decoration • Industrial Coatings
