

Industrial Spray Gun ST-2000

This high-performance spray gun is suitable for industrial and automotive applications. Its precision nozzle ensures optimal atomization for a variety of coatings.

Overview

Industrial Spray Gun ST-2000

The ST-2000 is a high-performance spray gun engineered specifically for demanding industrial and automotive environments. It features a precision-engineered nozzle that ensures optimal atomization, providing a smooth and consistent finish every time. Its ergonomic design is built for extended use, significantly reducing operator fatigue during long shifts, while the gravity-feed system minimizes material waste for increased operational efficiency.

Key Features

Suitable Materials

Paints, Lacquers, Primers

Technical Specifications

Adjustable Settings

- Fluid control
- Air control

Feed Type

Gravity Feed

Performance

Build Quality

Industrial Grade • Durable Construction
