

Industrial Steam Iron with Adjustable Valve

This industrial steam iron is equipped with a wooden handle and an adjustable steam valve. It features durable metal construction for efficient heat distribution and consistent steam output.

Product Overview

Professional Industrial Steam Iron

This industrial-grade steam iron is engineered for high-volume professional ironing applications, featuring a robust metal construction for superior heat distribution. Equipped with an adjustable steam valve and an ergonomic wooden handle, it ensures consistent steam output and comfortable operation during extended use. Designed for reliability and efficiency, this unit is an essential tool for demanding garment care environments.

Technical Specifications

Model Identifier	YG-1B
Build Material	Durable Metal
Handle Material	Wood

Features

Key Capabilities

- Adjustable steam valve
- Industrial-grade construction
- Ergonomic handle design
- Consistent steam output

Steam Control	Yes
