

Industrial Steel Chains

Industrial chains are suitable for various applications, including conveyor, elevator, and drive systems. Constructed from high-strength steel, these chains are engineered for durability and reliability in demanding environments.

Product Overview

Industrial Steel Chains

These high-strength steel chains are engineered for durability and reliability in the most demanding industrial environments. Designed for versatility, they are suitable for conveyor, elevator, and drive systems across agricultural, manufacturing, and material handling sectors. Each unit features hardened components and precision engineering to ensure superior resistance to wear and corrosion.

Technical Specifications

Material	High-strength steel
Key Features	Hardened components, Precision engineering, Wear resistant, Corrosion resistant

Applications

Suitable Industries

- Agricultural
- Manufacturing
- Material handling

System Compatibility

Conveyor systems • Elevator systems • Drive systems
