

Industrial Storage Container with Latched Lid

This durable storage container is designed for industrial and general machinery applications. Constructed from translucent plastic, it allows for easy identification of contents and features a secure lid with latches.

Product Overview

Industrial-Grade Storage Solution

This durable storage container is engineered for professional industrial and general machinery applications. Its high-quality, translucent construction allows for quick content identification, while the secure latched lid system ensures robust protection against dust and moisture. Designed for efficiency, the compact, stackable footprint maximizes space utilization in busy workshop or warehouse environments.

Key Features

Primary Applications

- Small parts organization
- Tool storage
- Component management
- General machinery applications

Build Characteristics

Impact Resistant, Wear Resistant, Dust Proof, Moisture Protection

Design Specifications

Transparency

Translucent

Stackable

Yes

Closure Mechanism

Integrated latching system
