

# Industrial Synchronous Timing Belt

This industrial timing belt is designed for optimal power transmission and lasting durability. Premium rubber compounds provide resistance to wear, heat, and chemical degradation.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Synchronous Timing Belt

This industrial synchronous timing belt is engineered for precision power transmission in mechanical equipment. Constructed from premium rubber compounds, it offers exceptional resistance to heat, wear, and chemical degradation. Its precision-molded teeth ensure accurate engagement with pulleys, minimizing slippage and maintaining consistent timing for stable, low-noise operation.

## Performance Characteristics

### Operating Limits

**50 m/s**

Max Transmission Speed

**10**

Max Speed Ratio

### Key Benefits

High Transmission Efficiency, Low Noise, No Slippage, Oil Resistant, Moisture Resistant, No Lubrication Required

## Technical Specifications

### Available Timing Belt Types

Type	Pitch (mm)	Tooth Height (mm)
MXL	2.032	0.51
XXL	3.175	0.76
XL	5.08	1.27
L	9.525	1.91
H	12.7	2.29
T2.5	2.5	0.7
T5	5	1.2
T10	10	2.5
3M	3	1.17
5M	5	2.06
8M	8	3.36

### Production Length Range

600mm - 3175mm
