

Industrial Textile Dyeing and Washing Machine

This industrial textile processing machine is designed for dyeing and washing fabrics. It features a stainless steel chamber with multiple access doors, control panels, and an overhead ventilation system.

Product Overview

Industrial Textile Dyeing and Washing Machine

This high-capacity industrial textile processing machine is engineered for heavy-duty dyeing, washing, and specialized fabric treatment applications. Featuring a robust stainless steel chamber, it is designed for durability and longevity in high-volume production environments. The system integrates advanced fluid handling through external tanks and plumbing, alongside comprehensive control panels for precise process management.

Technical Features

Integrated Systems

- Overhead ventilation system
- External fluid handling tanks
- Advanced control panels
- Multiple access doors

Material	Stainless steel
Processes	Dyeing, Washing, Fabric Treatment
