

Industrial Textile Sublimation Printer

This industrial printer utilizes thermal sublimation for direct injection onto textiles. It is engineered for large-format printing, delivering vibrant colors and sharp details on a variety of materials.

Overview

Industrial Thermal Sublimation Printer

This high-precision industrial thermal sublimation direct injection machine is engineered for large-format printing on textiles and various compatible materials. It features advanced printhead technology to ensure vibrant color reproduction and sharp, professional-grade details. Built for continuous operation, the robust media handling system and user-friendly workflow software make it an ideal solution for high-volume applications like fashion apparel, home décor, and large-scale advertising banners.

Technical Specifications

Model Number	FY-3200TX
Printing Technology	Thermal Sublimation Direct Injection

Key Features

System Highlights

- Advanced printhead technology for sharp details
- Robust media handling for continuous operation
- User-friendly workflow management software

Suitable Applications	Fashion Apparel, Home Décor, Advertising Banners
