

# Industrial Textile Washing Machine

This industrial textile washing machine is designed for efficient and thorough cleaning. It features a robust construction with a large-capacity drum and a user-friendly control panel for programmable wash cycles.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Textile Processing Solution

This industrial textile washing machine is engineered for high-volume processing, featuring a large-diameter inner drum optimized for specialized treatments like stone and enzyme washing. Designed for operational efficiency, it incorporates variable frequency speed control, a tiltable body for automatic unloading, and precise PLC-based touch screen controls. The machine is built to handle heavy-duty garments such as jeans and coats, providing a robust and reliable solution for demanding laundry facilities.

## Technical Specifications

Loading Structure	Front loading
Unloading Method	Tiltable body for automatic unloading
Heating Method	Direct steam heating
Spinning Function	No
Control System	PLC with touch screen

## Performance Features

### Water Control

- Electric controlled pneumatic water feeding system
- Integrated flowmeter for accurate level control

Suitable Wash Types	Stone wash, Enzyme wash
---------------------	-------------------------

## Optional Configurations

### Available Upgrades

Salt dosing tank (200L) • Chemical dosing tank (100L) • Automatic Chemical Feeding System • External Indirect Heat Exchange • Water circulation pump with filtering
