

Industrial Three-Phase Asynchronous Motor

This high-efficiency three-phase asynchronous motor is designed for industrial applications. It features a robust cast iron frame and optimized cooling for reliable performance.

Product Overview

Industrial Efficiency

The YE2 series is a high-efficiency three-phase asynchronous motor designed to meet the rigorous demands of industrial environments. Built with a high-strength cast iron structure, it offers superior reliability, quiet operation, and minimal vibration. It is an ideal power solution for critical equipment such as pumps, fans, compressors, and various types of construction machinery.

Technical Standards

Model Specifications

| Property | Value |
|-------------------|------------|
| Series | YE2 |
| Model Designation | MS 80B4 01 |

Compliance & Ratings

CE Certified, IEC 60034-30, High Efficiency

Key Features

Performance Advantages

- High-strength cast iron frame
- Optimized thermal cooling fins
- Low noise emission
- Minimal mechanical vibration
- Durable winding construction

Operational Highlights

3 Phase

Phase Rating
