

Industrial Three-Phase Induction Motor

This high-efficiency three-phase induction motor is designed for industrial applications. It features a robust cast iron frame for durability and vibration resistance.

Overview

High-Efficiency Industrial Motor

This high-efficiency three-phase induction motor is engineered for demanding industrial environments. Featuring a robust cast iron frame, it offers superior durability and vibration resistance for continuous duty operation. Designed to power pumps, fans, compressors, and heavy-duty machinery, it combines high starting torque with low noise levels and an efficient cooling system.
