

Industrial Transfer Case

This transfer case provides reliable power distribution for engineering machinery and other industries. Its lightweight design and high reliability make it suitable for demanding applications.

Product Overview

Industrial Transfer Case

This industrial transfer case is a robust mechanical component engineered for demanding applications requiring reliable power distribution. Designed to facilitate efficient power transfer from the engine to multiple axles, it supports all-wheel drive functionality in heavy-duty vehicles. With precision-engineered gears and high-strength housing, this unit ensures durability and optimal performance even in harsh operating conditions.

Technical Specifications

Gear Ratios

- 0.589
- 0.659
- 0.756
- 0.825

Available Models

0401, 0501

Performance Metrics

Output Torque Capacity

1390 N.m

Max Output Torque (Pump)

40000 N.m

Max Output Torque (Walking Shift)
