

Industrial Transmission Gear

High-precision transmission gear designed for robust mechanical power transfer. Manufactured with durable materials to ensure longevity and reliability in demanding industrial applications.

Product Overview

Industrial Precision Engineering

This high-precision transmission gear is engineered for robust mechanical power transfer in demanding industrial environments. Featuring a specialized toothed design, it ensures optimal engagement and minimal slippage during operation. The component is manufactured from durable materials to provide long-term reliability and performance across a variety of heavy-duty machinery applications.

Technical Specifications

Net Weight	1.3 Kg
Model Identifier	SM-1154
Customs Tariff Code	82292100

Key Features

Performance Features	High-Precision, Robust Design, Minimal Slippage, Durable Material
----------------------	---
