

Industrial Tumble Dryer

This industrial tumble dryer efficiently dries textiles and other materials. It features a stainless steel drum and programmable micro-computer for easy operation.

Overview

Industrial Tumble Dryer

This SWA801 series industrial tumble dryer is designed for high-efficiency performance in commercial environments such as hotels, hospitals, and professional laundry facilities. Featuring a robust stainless steel drum and vertical structure, it offers programmable micro-computer control for precise temperature and time management. The unit is equipped with a self-cleaning lint filter and a large door with toughened glass for convenient operation and monitoring.
