

Industrial Tumbler for Fastener Cleaning

This industrial tumbler is designed for cleaning, polishing, and deburring nuts, bolts, and other small metal parts. The tumbler features a rotating drum powered by an electric motor and supported by a sturdy metal frame.

Product Overview

Industrial Tumbler for Fastener Cleaning

This industrial-grade tumbler is engineered for the efficient cleaning, polishing, and deburring of nuts, bolts, and various small metal components. Featuring a robust rotating drum powered by a reliable electric motor, it utilizes a specialized gearbox and pulley system to maintain optimal rotational speeds for consistent surface finishing. Designed for durability in demanding industrial environments, this unit is an essential solution for high-volume fastener processing.

Technical Specifications

Drive System

- Electric motor
- Gearbox
- Pulley system

Construction Type

Sturdy metal frame • Industrial grade

Process Capabilities

Cleaning, Polishing, Deburring
