

Industrial Ultrasonic Cleaning Machine

This industrial-grade ultrasonic cleaning machine is designed for efficient and thorough cleaning of various components. It utilizes high-frequency sound waves to create cavitation bubbles in a cleaning solution, effectively removing dirt, grease, and contaminants from submerged objects.

Product Overview

Industrial Ultrasonic Cleaning Solution

The industrial-grade ultrasonic cleaner is engineered for high-efficiency, continuous operation in demanding production environments. By utilizing advanced ultrasonic cavitation, it provides deep cleaning for metal parts and electronic components, ensuring the removal of grease and contaminants. Designed for heavy-duty mass production, it offers precise control over power and temperature to deliver consistent, high-quality results.

Technical Performance

Power Adjustment

100 %

Adjustable Power

Thermostat Range

30-110 °C

Frequency Options

28KHz, 40KHz, 68KHz, 120KHz

Operational Features

Operating Mode

24-Hour Continuous Work • Industrial Design • Sweep Function

System Components

In the Box

- Ultrasonic cleaning unit
- Protective enclosure
- Wash basket
