

Industrial UV Flatbed Printer

This large format UV flatbed printer is designed for industrial printing applications, featuring a robust construction for rigid substrates. It utilizes UV curing technology for instant drying and durable prints, along with a computer control system for precise management.

Overview

Industrial UV Flatbed Printing Solution

This large format UV flatbed printer is engineered for high-performance industrial printing applications. It features a robust construction designed to handle rigid substrates with precision, utilizing advanced UV curing technology for instant drying and durable, high-quality finishes. With multiple print heads and an integrated computer control system, this machine offers efficient workflow optimization and vibrant color reproduction for professional-grade results.

Technical Capabilities

Printing Technology	UV Curing
Print Head Configuration	Multiple print heads

Applications & Compatibility

Compatible Materials	Acrylic, Glass, Wood, Metal
----------------------	-----------------------------

System Features

Key Features

- Large format printing area
- Robust industrial construction
- Instant UV curing
- Workflow optimization software

Control System	Yes
----------------	-----
