

Industrial V-Belt for Power Transmission

This V-belt is designed for power transmission in industrial machinery. Constructed from durable rubber, it provides reliable performance and longevity.

Product Overview

Industrial Power Transmission Solution

These industrial V-belts are engineered for high-performance power transmission in demanding machinery environments. Manufactured from durable rubber, they feature a high-quality edge-trimming and cloth-wrapping construction to ensure resistance to wear and reliable power transfer. Designed for longevity, these belts are an essential component for diverse industrial applications requiring consistent operation.

Technical Details

Model Specifications

- SPB 1885 LW
- X29
- X16

Material	Rubber
Construction Style	Edge-trimming, Cloth-wrapping

Logistics

Packaging

Carton

Place of Origin	Shenzhen, China
Production Lead Time	7 days
Payment Terms	30% T/T in advance
