Product Overview

Industrial Vacuum Sealing Solution

This industrial vacuum sealing machine is designed to automate the extraction of air and sealing process for various products in the food, chemical, and pharmaceutical industries. Featuring a user-friendly automated control system, it handles vacuuming, sealing, printing, cooling, and exhausting in a single cycle. Its compact, lightweight, and energy-efficient design makes it an ideal solution for businesses ranging from retail stores and supermarkets to industrial processing facilities.

Technical Specifications

Automated Functions

- Vacuum extraction
- Gas flushing
- Sealing
- Printing
- Cooling
- Exhausting

Sealing Ring Material	Silica gel
Body Material Options	Stainless steel, Aluminum alloy, Titanium magnesium aluminum alloy

Application & Usage

Compatible Products

- Meat products
- Sauces
- Condiments
- Preserved fruits
- Grains
- Bean products
- Medicinal materials

Suitable Industries

Food Industry, Chemical Industry, Pharmaceuticals

Certifications & Compliance

Compliance Badges

CE Certified
