

Industrial Ventilation and Refrigeration Unit

This unit provides both refrigeration and ventilation for industrial settings. It is designed for efficient cooling and air circulation, featuring a metallic housing and accessible components.

Product Overview

Industrial Ventilation and Refrigeration Unit

This industrial-grade unit is engineered for high-performance cooling and air circulation in commercial or manufacturing environments. Featuring a robust metallic housing and precision cooling coils, the system is designed for seamless ceiling or duct mounting. Its architecture includes easily accessible maintenance panels, ensuring efficient filter replacement and long-term operational reliability.

Technical Features

Primary Applications

- Industrial Cooling
- Commercial Air Distribution
- HVAC Integration

Mounting Type	Ceiling Mounted, Duct Integrated
Materials	Reinforced Metallic Housing
Serviceability	Yes
