

Industrial Ventilation Fan Blade Assembly

This refrigeration and ventilation fan blade assembly is designed for use in compressors and other industrial machinery. Mounting brackets are attached to the blade assembly for secure installation within the intended equipment.

Product Overview

Industrial Ventilation Fan Blade Assembly

This industrial-grade ventilation fan blade assembly is engineered for high-performance cooling in refrigeration systems and heavy-duty machinery. Featuring a durable multi-blade configuration arranged around a central hub, it is designed to maximize airflow efficiency and heat dissipation. The unit comes equipped with integrated mounting brackets to ensure stable and secure installation in diverse industrial environments.

Technical Specifications

Primary Application	Refrigeration Systems, Industrial Machinery, Compressors
Construction Material	Durable Metal
Mounting Method	Integrated Mounting Brackets

Key Features

Performance Features

- Optimized blade geometry for high-volume airflow
- Engineered for heat prevention and thermal regulation
- Robust hub-and-blade structural integrity
- Compatibility with various industrial compressor models
