

Industrial Ventilation Unit with Heat Sink

This compact refrigeration and ventilation unit is designed for industrial applications. It features a robust fan and heat sink assembly for efficient thermal management.

Overview

Industrial Thermal Management Solution

This industrial ventilation unit is engineered for reliable thermal management in demanding environments. Featuring an integrated heat sink and robust fan assembly, it is optimized for high-performance cooling in compressors and various machinery. Its compact, efficient design makes it a versatile solution for professional industrial maintenance and integration needs.

Technical Specifications

Model Number	12038S24H
Operating Voltage	24 V
Rated Current	0.15 A

Certifications

Certifications	CE, FC
