

Industrial Vibrating Screen

This heavy-duty vibrating screen separates and classifies materials by size. Its robust construction features a steel frame, multiple support legs, and a vibrating deck with several discharge points.

Overview

Heavy-Duty Industrial Vibrating Screen

This industrial vibrating screen is engineered for high-volume material processing, classification, and separation tasks. Featuring a robust steel frame construction and a specialized vibrating deck, it is designed to withstand the rigors of mining, aggregate production, and recycling environments. The unit includes multiple discharge outlets, facilitating efficient material flow and sorting capabilities for professional industrial applications.

Construction & Design

Frame Material	Reinforced Steel
Deck Material	Corrosion-resistant metal
Design Features	Heavy-duty, Multi-outlet, Vibrating deck

Application

Intended Industries

- Mining
- Aggregate Processing
- Recycling
