

Industrial Washer Extractor

This industrial washer extractor is designed for heavy-duty laundry applications. It features a stainless steel drum and programmable controls for customized wash cycles.

Product Overview

Industrial Washer Extractor

This industrial washer extractor is engineered for high-volume commercial laundry operations, including hotels, hospitals, and institutional settings. It features a robust, fully-closed stainless steel construction that ensures durability and high standards of hygiene. Equipped with a user-friendly programmable computer control system, it offers significant energy and water savings while allowing for customized wash cycles to meet specific needs.

Technical Specifications

Single-door structure for convenient loading and unloading of laundry.

Model Capacity Matrix

Model	Min Capacity (kg)
XPQ-15	10
XPQ-20	15

Construction Highlights

- Stainless steel drum and case
- Advanced shock absorption suspension structure
- Single-door design for easier loading/unloading
- Fully-closed rear-drainage system

Features & Compliance

Heavy-duty stainless steel construction designed for commercial laundry environments.

Certifications

CE, ISO

Warranty

1 year
