

Industrial Water Chiller for CNC and Laser Machines

This water chiller is designed for cooling CNC and laser engraving machines. It is suitable for various industrial applications requiring reliable cooling solutions.

Product Overview

Industrial Precision Cooling

This high-precision industrial water chiller provides reliable thermal regulation for CNC and laser engraving machinery. Engineered for versatility, it features dual operation modes including intelligent temperature adjustment based on ambient conditions to ensure optimal performance. With a robust 3000W cooling capacity and stable control, this unit is built to maintain consistent results in demanding industrial environments.

Performance Specifications

Cooling Capacity

3000 W

Cooling Capacity

0.5 °C

Temperature Stability

Operation Modes

Constant Temperature, Intelligent Temperature Control

Technical Details

Voltage Range

110V-220V

Frequency

60 Hz

Compatible Refrigerants

R-22, R-410a

System Capacity

Flow and Lift Performance

Metric	Range
Tank Capacity	15L
Max Flow Rate	13 - 70 L/min
Max Lift Height	10 - 53 M

Physical Dimensions

Weights

- Net Weight: 60kg
- Gross Weight: 70kg

Unit Dimensions (LxWxH)

67 x 47 x 89 cm

Certifications

Compliance Standards

CE • RoHS
