

Industrial Water Chiller for CNC Spindle Engraving

This portable water chiller features a 500W/ radiating capacity and a 9L tank. It is widely used for cooling CNC spindle engraving machines, laser engraving equipment, and laser cutting equipment.

Product Overview

Professional Thermolysis Cooling

The CW-3000 industrial water chiller is a high-performance cooling solution designed specifically for small heat load applications such as CNC spindle engraving, laser engraving, and laser cutting equipment. It utilizes a reliable thermolysis cooling method to maintain thermal stability and extend the operational lifespan of your machinery. Featuring a robust 9L tank capacity and an efficient radiating capacity of 50W/°C, this compact unit ensures consistent performance while incorporating essential safety features like water flow and temperature alarms.

Technical Specifications

General Specifications

Feature	Value
Voltage	110V-220V
Frequency	50/60Hz
Max Flow	2L/min - 10L/min
Dimensions (L x W x H)	48 x 27 x 38 cm
Net Weight	9.5kg - 12kg

Compliance & Quality

Certifications	CE, RoHS, REACH, ISO
Warranty Period	2 years
