

Industrial Water Chiller Unit

This water chiller provides efficient cooling for industrial applications. It features precise temperature control, easy installation, and an alarm system.

Overview

Industrial Refrigeration Solution

This industrial water chiller is a high-performance refrigeration unit designed for precise thermal management in demanding environments. With an 800W cooling capacity, it effectively dissipates heat generated during laser device operation through a reliable compressor-based cycle. The compact, robust design ensures easy integration and energy-efficient operation for continuous industrial use.

Performance Metrics

Cooling Capacity

800 W

Cooling Capacity

Pump Power Options

- 0.03KW
- 0.051KW
- 0.1KW

Flow Rate

10L/min - 16L/min

Technical Specifications

Tank Capacity

6 L

Refrigerant

R-134a

Maximum Lift

10M - 25M

Dimensions and Weight

Weight Specifications

Type	Value
Net Weight (kg)	24
Gross Weight (kg)	27

Unit Dimensions (L x W x H)

58 x 29 x 47 cm

Compliance and Quality

Certifications

CE, RoHS
