

Industrial Water-Cooled Screw Chiller

This high-efficiency water-cooled screw chiller is designed for industrial and commercial cooling applications. It features a screw compressor for reliable and energy-efficient operation.

Product Overview

Industrial Water-Cooled Efficiency

This high-performance water-cooled screw chiller is engineered for robust industrial and commercial cooling requirements. Utilizing R134a refrigerant, the unit ensures stable temperature management and energy-efficient operation. Equipped with advanced shell and tube heat exchange technology, it delivers reliable cooling capacity for demanding environments such as data centers and large-scale manufacturing facilities.

Technical Specifications

Rated Cooling Capacity

400 KW

Cooling Capacity

Refrigerant

R134a

Heat Exchanger

Closed shell and tube condenser

Features & Capabilities

Safety and Control

- Overpressure protection
- Overtemperature protection
- Advanced control interface
- Energy optimization systems

Operational Features

Water-Cooled, Screw Compressor, Cooling & Heating, Industrial Grade
