

Industrial Waterjet Cutting Machine

This industrial waterjet cutting machine is designed for precision cutting of various materials. It features a robust gantry system for accurate movement of the cutting head.

Product Overview

Industrial Waterjet Cutting Performance

This industrial waterjet cutting machine is engineered for high-precision cutting across a diverse range of materials, including metals, composites, stone, and glass. It features a heavy-duty gantry system designed for superior motion accuracy and a spacious worktable with an integrated gridded support surface. Safety and operational efficiency are prioritized through an enclosed frame for noise reduction and an integrated abrasive delivery system for enhanced cutting capability.

Technical Features

System Components

- Robust gantry system
- Gridded support worktable
- Abrasive hopper and delivery system
- Protective safety enclosure

Compatible Materials

Metals, Composites, Stone, Glass

Operational Safety

Safety and Environment

Noise Reduction • Protective Frame
