

Industrial Welding Machine

This welding machine is designed for heavy-duty industrial use. It offers adjustable voltage and current settings, durable construction, and portability with integrated wheels.

Product Overview

Industrial-Grade Welding Power

This high-performance welding machine is engineered specifically for demanding, heavy-duty industrial applications. Built for both precision and longevity, it features robust construction and integrated portability via heavy-duty wheels. It supports versatile welding processes, ensuring reliable performance in the most rigorous work environments.

Technical Specifications

Performance Metrics

630 A

Max Rated Current

Available Models

ZX5-630A, ZX5-400B

Operational Features

Control Features

- Adjustable voltage settings
- Adjustable current settings

Design and Portability

Build Quality

Robust construction • Heavy-duty design

Mobility

Yes
