

Industrial Welding Machine

This industrial welding machine is designed for various manufacturing and processing applications. It features adjustable welding current and voltage controls, ensuring precise and efficient welding operations.

Overview

Industrial Welding Solution

This industrial welding machine is engineered for high-precision manufacturing and processing applications. It features intuitive controls for welding current and voltage, allowing operators to achieve consistent results across various tasks. Equipped with an integrated wire feeder system, the unit is designed to streamline welding operations and improve overall efficiency on the production floor.

Technical Specifications

Welding Current

200 A

Rated Current

Adjustable Controls

Welding Current, Welding Voltage, Output Filler Current, Output Filler Voltage, Wire Diameter Adjustment

Operational Features

Safety and Status Indicators

Power Indicator • Gas Status • Wire Status • Abnormal Alert

Cooling System

Integrated fan heater with 30-second delay shutdown

Wire Feeder System

Yes
