

Industrial Welding Machine with Multiple Stations

This industrial welding machine is designed for heavy-duty welding applications. It features multiple welding stations with individual controls, robust construction, and safety features.

Product Overview

Industrial Multi-Station Welding Solution

The ZXE1-500 industrial welding machine is engineered for high-demand, heavy-duty welding applications. It features multiple welding stations equipped with individual controls, allowing for streamlined operations and increased throughput. Built for durability and operator safety, this system is compatible with a wide variety of welding processes and materials.

Technical Specifications

Model Number	ZXE1-500 / AS/SA-500IWM
Station Count	2

Key Features

Operational Highlights

- Multiple independent station controls
- Heavy-duty industrial construction
- Integrated operator safety protocols
- Versatile material compatibility

Certification & Standards

Compliance	Industrial Grade, Safety Certified
