

Industrial Wheat Flour Milling Machine

This flour machine is designed for processing wheat into flour. It features a high capacity, ranging from 100 to 500 tons per 24 hours.

Overview

Industrial Wheat Flour Milling Solution

This industrial wheat flour milling machine is designed for high-capacity production facilities, offering an output range of 10t to 500t per 24 hours. Built with a robust storey-structure design, it utilizes advanced pneumatic grinding and square plansifter technology to ensure precise separation of husk, core, and residue. The system supports both dry and wet grain cleaning processes, providing a reliable turnkey solution for producing high-grade flour.

Technical Specifications

Production Capacity

10 t/24h

Minimum Output

500 t/24h

Maximum Output

Grain Cleaning Compatibility

Dry Process • Wet Process • Combined Process

Series Type

6FTF Series

Milling Technology

25 Series Duplex Milling, Automatic Pneumatic Grinding, Square Plansifter Sieve, Purification

Design & Installation

Service Scope

- Project Design
- Equipment Installation
- Technical Training
- Turnkey Project Delivery

Structure Type

Multi-storey structure (3+ floors)

Support & Warranty

Warranty & Support

- 1-year free warranty
- Replacement parts included
- Lifetime maintenance
