

Industrial Wood Planer with Dust Collection

This woodworking machinery features a planing mechanism with adjustable height and a dust collection system. It is designed for professional woodworking applications, offering precision and dust management.

Overview

Professional Industrial Wood Planer

This industrial-grade wood planer is engineered for precision woodworking in professional environments. Featuring a robust cabinet base and an integrated dust collection system, it ensures clean and efficient operation. Its adjustable planing mechanism allows for versatile material processing, making it an essential asset for high-performance woodworking workshops.

Technical Specifications

Operation

- Manual handwheel for height adjustment
- Side-mounted control panel with power switches

Construction

Robust cabinet base with ventilation slots

Integrated Systems

Dust Collection System, Adjustable Planing Height, Control Panel
