

Industry and Commerce Administration Software Platform

This software platform is designed for industry and commerce administration. It integrates various management systems, including enterprise credit and case management.

Product Overview

Comprehensive Administration Platform

This Industry and Commerce Administration Software Platform is a robust, integrated management solution designed to streamline complex regulatory and administrative workflows. It centralizes critical functions such as registration management, trademark and contract oversight, and market supervision into a single, cohesive interface. By incorporating modules for enterprise credit systems, law enforcement supervision, and office automation, the platform empowers organizations to maintain rigorous data integrity and operational efficiency.

Core Management Modules

Available Modules

- Name Management
- Registration Management
- Supervision Management
- Trademark & Advertising Management
