

Infrared Laser Night Vision Surveillance Camera

High-performance surveillance camera equipped with infrared laser technology for superior night vision. It is designed for security and monitoring, providing clear images in low-light conditions with extended range.

Overview

Advanced Night Vision Surveillance

This high-performance surveillance camera is engineered for demanding outdoor security and monitoring applications. It features integrated infrared laser illumination, which provides superior image clarity and extended range in low-light or complete darkness. Designed for reliability, this solution ensures detailed visual data capture even in the most challenging nighttime environments.

Key Features

Night Vision Technology

Infrared Laser Illumination • Long-Range Capability • Low-Light Performance • Zero-Light Operation

Suitable Environments

- Outdoor Security
- Perimeter Monitoring
- Demanding Environments
