Product Overview

Advanced Infrared Heating Solution

This infrared space heater utilizes dual-core integrated heating technology, combining far-infrared radiation with convection heating for efficient warmth. Designed for both comfort and safety, it operates silently without light or odor, making it suitable for bedrooms, living rooms, and office environments. The unit features an aerodynamic design and advanced electronic temperature control for precise, whole-house heating.

Performance & Technology

Efficiency Highlights

20 %

Efficiency Improvement

10 dB

Operating Noise

Heating Method

Far Infrared, Convection Heating, Digital Inverter

Safety & Control

Safety Protections

IP24 Waterproof • Dump Power Off • Overheating Protection

Temperature Control Accuracy

0.1 °C

Design & Build

Design Specifications

- Aerodynamic body design
- Large air intake
- Perforated metal front panel
- Electronic probe sensor
- Stable floor-standing feet
