Overview

Inground Scissor Car Lift

This full-rise scissor lift features an inground mounting design, making it an ideal space-saving solution for professional workshops and garages. Built with a heavy-duty four-hydraulic cylinder system, it ensures stable and reliable lifting performance. The unit includes advanced safety features such as mechanical locks, motor overload protection, and low-tension controls, providing a secure environment for vehicle maintenance.

Performance Metrics

Lifting Capacity

3000 kg
Capacity

Cycle Times

70 s

Lifting Time

65 s

Lowering Time

Technical Specifications

Max Lifting Height	1820 mm
Lowered Height	300 mm
Motor Power	2.2 kw
Machine Weight	700 kg
Power Supply Options	110V, 220V, 380V, 50Hz, 60Hz, 1PH, 3PH

Safety & Features

Safety & Operational Features

- Self-mechanical lock for safety
- Pneumatic unlock system
- 24V low-tension safety control
- Alarm alert during lowering
- Built-in motor overload protection
- Drawer-type extensible platform
- Slotting and heighten rubber adaptors included

Certifications

CE Certified
