

Injection Molded Plastic Components

Injection molded plastic components are manufactured using precision techniques. These components are suitable for use in diverse consumer and industrial products.

Product Overview

Precision Injection Molded Solutions

These high-quality injection molded plastic components are engineered for versatility and precision across various industrial and consumer applications. The manufacturing process ensures consistent detail and structural integrity, making them suitable for complex assemblies. From consumer electronics housings to mechanical parts, these components demonstrate the reliability required for modern manufacturing standards.

Component Details

Included Component Examples

- CD Box
- Hairdryer Shell
- Charger Part
- Wheel

Manufacturing Specifications

Mould Reference IDs

Component	Mould ID
CD Box	Mould_478
Hairdryer Shell	Mould_47
Charger Part	Mould_476
Wheel	Mould_149

Production Method

Injection Molding • Precision Manufacturing
