

Injection Mould

This precision-engineered mould is designed for high-volume manufacturing processes. It features multiple cavities to increase throughput and integrated cooling channels for optimal temperature regulation.

Product Overview

Precision Injection Moulding Solution

This precision-engineered injection mould is designed specifically for high-volume manufacturing environments. Built with high-grade steel, it ensures exceptional durability and longevity for demanding production schedules. The design incorporates advanced features such as multiple cavities for increased throughput and integrated cooling channels for optimal temperature regulation.

Technical Specifications

Compatible Materials

- Plastics
- Composites

Construction Material	High-grade steel
Compatible Processes	Injection Moulding

Operational Features

Key Features

Multiple Cavities • Integrated Cooling Channels • Ejector Pins • Quick-Change System

Automation	Yes
------------	-----
