Product Overview

Premium Ink Refill Solution

This high-quality ink refill solution is engineered for optimal performance in ink tank printers, offering vibrant color reproduction and sharp text clarity. Formulated with advanced nanofiltration technology, the ink ensures smooth, clog-free operation while maintaining a neutral pH to protect printer hardware. Designed for reliability, this ink provides excellent resistance to environmental factors, including temperature fluctuations, humidity, and UV light, ensuring long-lasting, fade-resistant prints.

Technical Specifications

Ink Capacity

127 ml

Black Ink

70 ml

Color Ink (CMY)

Particle Size

20 nm

Key Technologies
