

Inline Centrifugal Pump for Fluid Transfer

This inline centrifugal pump is designed for efficient fluid transfer in industrial settings. Its robust construction ensures durability and consistent flow, making it suitable for demanding pumping applications.

Product Overview

SGR Series Pipeline Centrifugal Pump

The SGR series pipeline centrifugal pump is engineered for efficient fluid transfer across diverse industrial environments. Its robust construction ensures durability, while the inline configuration facilitates straightforward installation and maintenance within existing piping systems. Designed for a compact footprint, this pump provides a consistent flow rate, making it an ideal solution for water circulation, pressure boosting, and general fluid handling applications.

Key Features

Design Highlights

Inline Configuration, Compact Footprint, Robust Construction, Centrifugal Design

Applications

Typical Applications

- Water circulation systems
- Pressure boosting
- General fluid handling

Performance

Flow Type

Smooth and consistent
