

Inline Mini Blade Fuse Holder with Cover

This inline mini blade fuse holder is designed for automotive electrical systems. It provides a secure and waterproof connection for mini blade fuses and features pre-stripped wire leads for easy installation.

Product Overview

Inline Mini Blade Fuse Holder

This inline mini blade fuse holder is engineered to protect automobile electrical circuits and sensitive electronic devices. It features a durable construction with a snap-fit protective cover that safeguards the fuse against moisture and debris. Designed for versatility, it is suitable for integration into both 12V and 24V electrical systems.

Technical Specifications

Protection Features

Waterproof • Snap-fit Cover • Debris Resistant

Compatible Fuse Type	Mini Blade Fuse
Voltage Compatibility	12V, 24V

Installation & Application

Common Applications

- Car Audio Systems
- Lighting Circuits
- General Automotive Electronics

Installation Method	Inline with pre-stripped wire leads
