

Inspection Pick and Scraper Set

This set includes three inspection instruments with blue plastic handles and stainless steel blades. The instruments are designed for scraping, cleaning, and inspecting surfaces and are suitable for use in machinery maintenance, industrial cleaning, and quality control processes.

Product Overview

Professional Inspection and Maintenance Set

This versatile set of three inspection instruments is engineered for precision tasks in machinery maintenance, industrial cleaning, and quality control. Featuring durable stainless steel blades and ergonomically designed blue plastic handles, these tools provide the control needed for delicate scraping and inspection work. The varied blade shapes ensure adaptability across a wide range of surface cleaning and verification applications.

Technical Specifications

Set Composition	3 pieces
Blade Material	Stainless Steel
Handle Material	Plastic

Application

Design Features

Ergonomic Handle • Precision Control • Corrosion Resistant

Primary Applications	Machinery Maintenance, Industrial Cleaning, Quality Control, Surface Inspection
