Product Overview

High-Efficiency Instant Noodle Production

The XBF-III automatic instant noodle processing line is designed with a compact structure and perfect technology to deliver stable performance in a small footprint. It offers high automation and convenient operation, streamlining the entire workflow from flour feeding to the finished product in a single continuous process. This system is specifically engineered for small-scale or self-owned enterprises, providing an affordable entry point into high-quality noodle manufacturing.

Technical Specifications

Production Workflow

- Dough mixing
- Roller pressing
- Boiling/Steaming
- Cutting and shaping
- Frying (Electric or Steam)
- Cooling
- Packaging

Production Capacity

30000 packs/shift

Minimum Capacity

200000 packs/shift

Maximum Capacity

Key Features

Compact Structure, High Automation, Stainless Steel Construction, PLC Control, Low Energy Consumption

Product Performance

Noodle Quality

Characteristic	Description
Texture	Tenacious and smooth
Appearance	Transparent
Rehydration	Easy to saturate by water
