Product Overview

Restoring Dashboard Functionality

This high-voltage transformer is designed as a direct replacement component for automotive instrument clusters. It effectively resolves common dashboard electrical failures, such as no lighting, partial illumination, flickering, or visibility issues with digital displays. These units are essential for technicians performing precision repairs on vehicle instrument electronics.

Compatibility Details

Available Types

Type	Model Year Range	Memory Component
Type A	1998-2000	93C66 EEPROM
Type B	2000-2005	24c04 EEPROM

Technical Specifications

Compatible Part Numbers	8 903 428 016, 9 948 411 098, 9 948 411 025, 9 948 411 09 027
Mounting Method	PCB Through-Hole Mounting
