

Insulated Alligator Clip Set

These insulated alligator clips are designed for temporary electrical connections. They feature spring-loaded jaws with serrated teeth to ensure a secure grip and insulated handles for user safety.

Product Overview

Professional Insulated Alligator Clips

These compact, insulated alligator clips are designed for reliable and safe temporary electrical connections in electronics and automotive prototyping. Featuring a spring-loaded jaw with serrated teeth, they provide a secure and stable grip for test leads. The included insulating boots in red and black help prevent accidental short circuits, making them an essential tool for quick repairs and bench-top testing.
