

Insulated Combination Pliers

Combination pliers feature insulated handles for safe use in electrical applications. These pliers are designed for gripping, twisting, and cutting a variety of materials.

Product Overview

Professional Insulated Pliers

These combination pliers are designed for versatile utility, featuring side cutting jaws for efficient wire cutting and gripping. The insulated handles provide essential protection for electrical work, while the ergonomic design ensures a secure and comfortable grip. Available in three distinct sizes, these tools are built to handle various materials with precision and safety.
