

Insulated Communication Cable

These insulated cables are designed for communication purposes within electronic systems. They facilitate signal transmission through internal wiring.

Product Overview

Versatile Communication Cabling

These insulated communication cables are engineered for reliable signal transmission and internal wiring within complex electronic systems. Available in both single-core and multi-core configurations, they offer flexibility for various installation environments. The vibrant color-coding system ensures efficient identification and simplified maintenance during system assembly.

Technical Specifications

Available Configurations

- Single-core insulated cable
- Multi-core communication cable

Installation Compatibility

Internal Wiring • Signal Transmission • Corrugated Conduit Compatible

Color Options

Blue, Green, Yellow, Red
