

# Insulated Diagonal Cutting Pliers

These diagonal pliers are designed for cutting wires and small components. The insulated handles ensure safe and comfortable use in electrical applications.

## ADDITIONAL IMAGES

## Product Overview

### Professional Insulated Diagonal Cutting Pliers

These insulated diagonal cutting pliers are engineered for high-voltage environments and heavy-duty cutting tasks. Featuring a durable construction with high-voltage insulation composite handles, they offer both safety and reliability. Designed for professional use, these tools are suitable for demanding sectors including petroleum, chemical, power generation, railway, and mining industries.

## Technical Specifications

Size Range	6-8 inch
Manufacturing Process	Hot Forged or Casting
Surface Treatment	Injection molding to prevent electrostatic
Handle Material	High voltage insulation composite materials

## Features & Safety

### Key Features

Insulated • Anti-static • High Power

Certifications	ISO9001, UKAS
Tool Color	Red

## Logistics

### Packaging Details

- Plastic bag (inner packing)
- Standard export carton boxes
- Wooden cases
- Pallet

### Delivery Time

2-5 days

## Applications

### Suitable Industries

- Petroleum
- Chemical Industry
- Power Generation
- Railway
- Mining
